Embedding Tableau Charts in Your Website

1. Visit your chart on the Tableau Public online website.
2. Click the Share icon in the banner at the bottom of your chart.

![Tableau Share Icon]

3. Copy all of the text under Embed Code.

4. Visit the edit screen of your website and go to the webpage where you’d like to add the chart. Drag the HTML embed option onto your website. It may say anything like one of the following: <Embed> or Source or HTML or Embed Code or </>.

   ![HTML Embed Option]

5. Click to edit the new box you added to your website, and paste in the Embed Code that you copied from Tableau Public.

6. Click the large blue “Publish” button in the top right corner and visit the public side of your website to view the embedded chart.
