Comforter

What you Need:

• (2) 2-yard fabric piece (one decorative front and one back)
• 2 yards of batting
• Sewing Machine
• (Optional) Decorative trimmings

Step 1

Layer your fabrics as follows: Lay first piece of fabric face up. Lay second piece of fabric atop the first face down. Place the fabric atop the fabric pieces and pin in place.

Step 2

Carefully trim the edges of the fabric pieces and batting so that they match.
Step 3

Flip the pinned piece over so that that fabric is on top. Mark a 1” allowance along the edge with a fabric marker (this mark will not be seen on the finished piece) leaving at least a 10” opening on one side.

Step 4

Using the mark that you made, sew along the hem of the edge of the comforter remembering to leave the opening.

Step 5

Once you have sewn all around, pull the comforter right side out through the opening that you left. (Note: Now is a good time to check for any gaps or areas that you may have missed when sewing. If any are found, turn fabric inside out and re-sew.) Sew opening closed with an overhand stitch.

You’ve just made a comforter! Take a picture of your finished creation #UTAMakers
