Pillows

What you Need:

- Small Cuts Fabric
- Measuring tape or ruler
- Scissors
- Pins
- Sewing Machine (FabLab Sewing Station)
- PolyFil

Step 1

Carefully measure and cut out two pieces of cloth in the shape and size you would like. Be sure to add 2” to both width and height. (For example: a lounge square throw pillow would need two pieces cut to 20”x20”)

Step 2

Lay fabric front over fabric back, right sides (the sides that will be seen) together. Pin edges.
Step 3

Sew pieces together with a 1” seam allowance. Leave a 5” opening to add filling.

Step 4

Carefully trim the edges to ½”. Tip: Trimming seams to varying widths will help make them less noticeable and trim closer at corners for a more seamless look.

Step 5

Turn fabric right side out and press edges with iron.

Step 6

Fill case with PolyFil and hand stitch opening closed.

You’ve just made a pillow! Take a picture of your finished creation #UTAMakers
