Hanging Organizer

What you Need:

- Piece of canvas
- Fabric Scraps
- (Optional) Fabric Fuse
- Sewing Machine
- Dowel Rod

Step 1

Create a 1” hem on the sides of your canvas fabric. You can use fabric fuse and an iron or you can sew the hem.

Step 1a (Fabric Fuse): Fold the edge of the canvas over 1” and use an iron to flatten the fold. Cut fabric fuse to length. Remove the paper backing from one side and place it inside of the crease. Without removing the top backing, fold the top down and iron over the fold. Remove the top layer of paper and repeat.

Step 1b (Sewing): Fold the edge of the canvas over 1” and sew in place using a straight stitch. (Decorative trims could also be added using scrap fabric)

Repeat for both sides.

Step 2

Create the opening for your rod by folding the top of your canvas over 1 ½”. Using the methods detailed above, secure the fold at the outermost part of the fold so that the rod can pass through.

Step 3

Cut your dowel rod to the appropriate length leaving at least 2” of rod protruding from either side.

Step 4

Cut your scrap fabrics into pockets and sew them unto the canvas using the sewing machine.

Step 5

Put the rod through the top opening. (You can secure the canvas to the rod using a tack)

Decorating and hanging your rod: There are a lot of options for hanging and decorating your rod. You can hang them using command or any other variety of wall hook or you can add paracord or hemp and create a rope hoop to hang it from.

You’ve just made a hanging wall organizer!
