Message Board

What you Need:

• Plywood
• Piece of Corkboard
• Foam backing
• Board Glue and Hot Glue
• Chalkboard paint and primer

Step 1

Choose the appropriate size piece of plywood for your board.

Step 2

Determine where you want your corkboard to go and draw lines to represent the space.

Step 3

Paint the surface of the board (Do not paint where the cork will go) with the chalk paint. Allow to dry for 15 minutes before applying another coat. Wait 15 minutes before proceeding.

Step 4

Cut a piece of cork board in the size and shape that you wish (Optional: The laser engraver can be used to cut the cork into custom designs)

Step 5

Using board glue, attach the cork to a piece of foam. Trim around the edge of the cork using scissors or an exacto knife.

Step 6

Glue foam to plywood in designated space.
