End of Block: Application Form

Start of Block: Course Information

Q13 Course name and number?

________________________________________________________________

Q14 What was enrollment in the class(s) when it was last taught?

________________________________________________________________

Q15 What is anticipated enrollment for the pilot semester in which the OER/project will be implemented?

________________________________________________________________

Q16 Include a link to the publicly shared syllabus used the last time the course was offered. If the syllabus is not yet shared publicly, you may upload a draft version below.

________________________________________________________________

Q17 If available, upload syllabus draft here if a version is not yet publicly shared.
Q18 What is the total cost per student of all resources currently required for this class? If this proposal is for a new course, provide an estimate for comparable commercial resources.

________________________________________________________________

Q19 Provide location or bibliographic information (URL, ISBN, or complete citation) for the resource(s) to be adopted in the course. If this proposal is to create a resource where there is currently a shortage of open materials, note that below.

________________________________________________________________

________________________________________________________________
Q20 Which of the following most accurately describes the required resource(s) to be adopted in this class, course, or program?

- Open textbook: full textbooks that are completely free (including from fees) and that are openly licensed (e.g., Creative Commons, public domain) so they can be legally modified. See the Open Textbook Library for examples. (1)

- Other OER: resources other than textbooks (e.g., videos, modules, handouts, websites) that are completely free (including from fees) and that are licensed to allow for reuse as described above. (2)

- Public resources: materials that are completely free (including from fees) for the public to access but that are fully protected by copyright. Please select this option if you do not know the copyright status of free materials used in your courses. (3)

- Library resources: library-licensed materials that are free for students because the library (or university) provides subscription access to the content. This includes scholarly articles from databases, e-books from the Libraries' collection, and tutorials such as those available through Lynda.com. (4)

- Low-cost resources: course materials that cost students $25 or less (in total). (5)

- Resource(s) cost students over $25. (6)

Q21 Provide any additional information necessary to describe the resources to be used in the course(s).

________________________________________________________________

Q22 Semester in which you intend to first pilot the OER/project?

________________________________________________________________

Q23 How frequently is the course(s) offered?

________________________________________________________________

End of Block: Course Information
Q24 Upload your letter of support from dean or director.

Q25 Please attach your proposal narrative, budget, and letter of support below. Attachments should not exceed ten pages in total.

Q26 Upload your narrative.

Q27 Upload your budget.

Q28 Additional comments:
